

DRINFO

Maximising DrInfo in your Practice

I have had a hard day
don't waste my time

Dr Diana North
Medical Director
DrInfo

Smarter not Harder

Stand back

- aerial view of your Practice

In 2008 are we:

- financially sustainable
- maximising our staff
- running efficient effective systems
- flexible and responsive to changing demands

Take time to think

Team :

- Do we work as a team?

Practice Issues

- What is working? What is not working?
- Identify specific practice concerns

Roles:

- How can we use our time more efficiently and effectively ?
- What do staff like doing?
- What would they like to give up?
- Is there another way “right person at the right time right place” ?

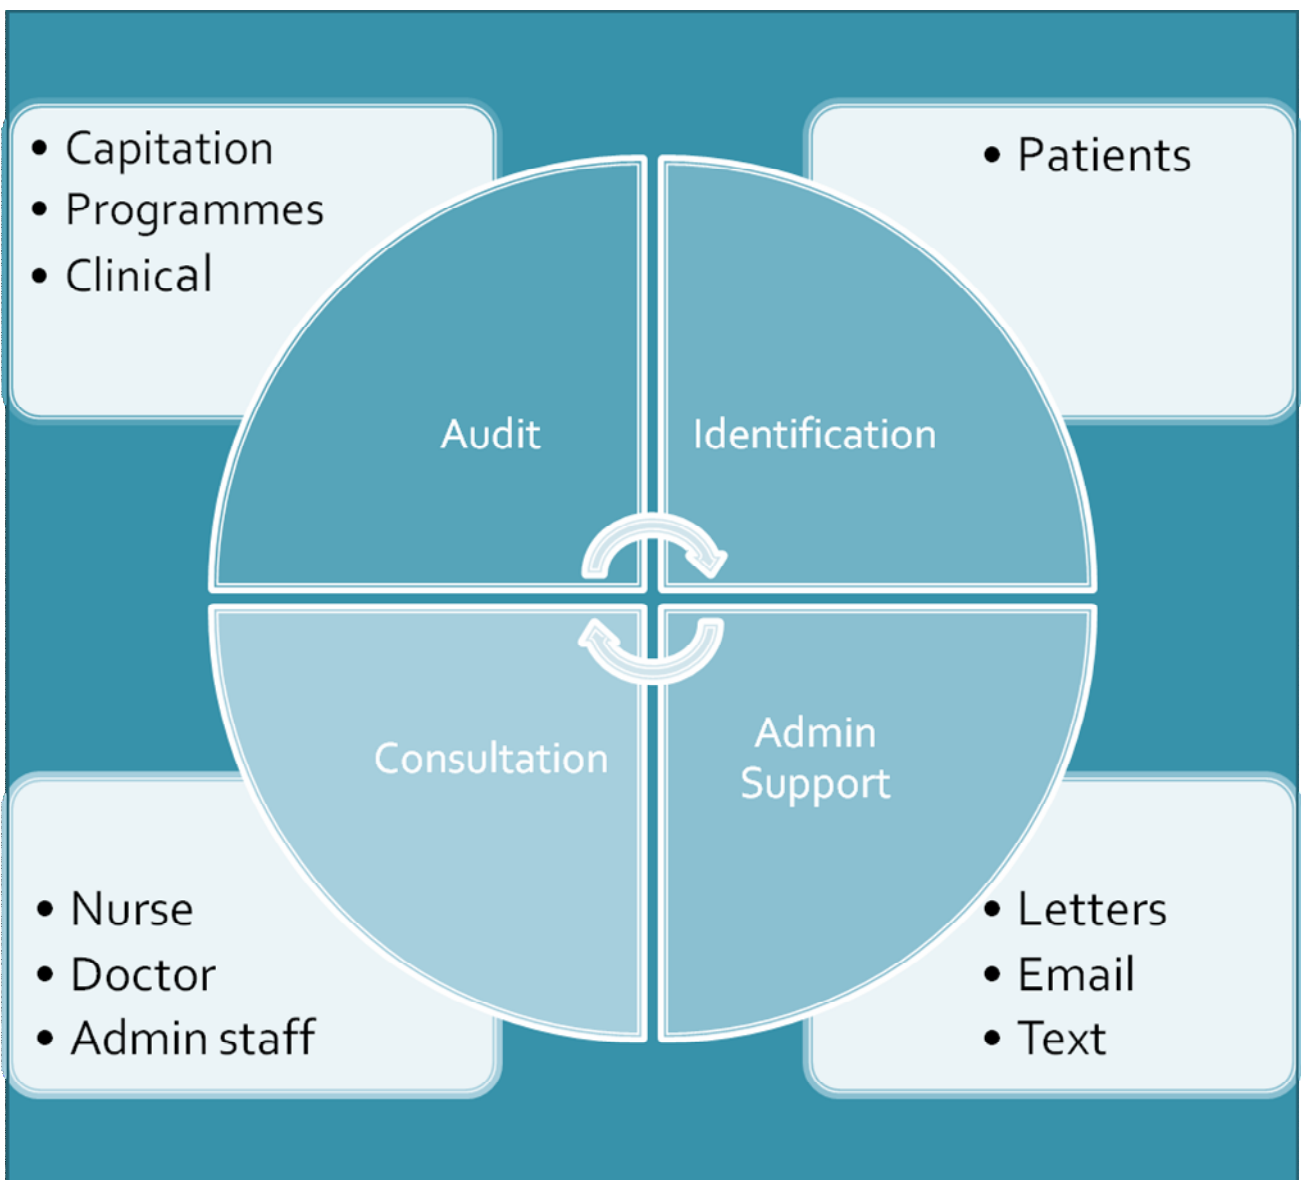

DrInfo

Designed to make General Practice tasks:

- Easier
- Faster
- Better outcomes

Overview

- Monthly practice audits complete with trend analysis of financial and clinical performance management
- Practice register management and reports to identify patients who qualify for population health programs but are not enrolled to receive program support or funding
- Practice assistance to identify and target specific patient groups who require follow up
- Administration support for contacting patients by mail, email or text with customised letters at the practices request
