A young seal pup, likely a California sea lion, is the central focus of the image. It is sitting upright on a dark, textured rock. The pup has a light-colored, fuzzy coat and a small, dark eye. Its flippers are visible, resting on the rock. In the background, another seal is partially visible, and the overall scene is set against a backdrop of dark, craggy rocks.

King Penguins

Photo by Tony Armstrong

A high-angle, wide shot of a vast colony of King penguins. The birds are densely packed across a grassy, sloping terrain, filling the entire frame. They exhibit their characteristic dark grey-blue backs and wings, white underparts, and a distinctive yellow-orange band around the neck. The sheer number of birds creates a complex, textured pattern of dark and light patches. The text "Lots of penguins" is superimposed in a large, white, sans-serif font across the middle of the image.

Lots of penguins

Photo by Su Yin Khoo

A photograph of several elephant seals resting on a dark, rocky beach. The seals have large, wrinkled heads and thick, brownish-yellow bodies. Two seals in the foreground are looking directly at the camera. In the background, there are more seals and a rocky coastline under a cloudy sky.
