(Plenary)

14:00 - 14:20 Elimination of Waste Before Healthcare Rationing

Rationing, the management of
healthcare waste and treatment injury.

Professor Des Gorman MD PhD

What is the intrinsic funding
philosophy underpinning population
based and capitated funding?

Is it ethical to ration healthcare in the
context of systemic waste and
significant levels of treatment injury?

What is the level of health system waste and how prevalent and costly is treatment injury?

The publication of waste and
treatment injury data, informed
consumers and referrers.

The potential impact of sophisticated
funding, purchasing and commissioning.

Rationing, the management of
healthcare waste and treatment injury.
